

COUNTY OF RIVERSIDE BUILDING AND SAFETY DEPARTMENT

SAMPLE SITE RESTORATION CERTIFICATION

Mike Lara
Director

The County of Riverside requires a licensed professional engineer to submit a wet signed and stamped restoration certification on company letterhead prior to obtaining Site Restoration Permit final. The purpose of this handout is to clarify the Site Restoration certification requirements for obtaining restoration permit final. Below is the required format (content to be modified based on restoration plan) of the certification for Site Restoration permit final.

Date:

Environmental Compliance Division
County of Riverside
Building and Safety Department
4080 Lemon Street, 2nd Floor
P.O. Box 1629
Riverside, CA 92502-1629

Attention:	Name
RE:	Site Restoration Final
Restoration Permit Number:	BHR000000
Project Address:	Street, City, CA zip
Assessors Parcel Number:	APN 000-000-000

Subject: Civil Engineer's Certification of Site Restoration Completion

I hereby approve that the above referenced project in accordance with my responsibilities under the California Building Code Chapter 17, 18 & Appendix J and Riverside County Ordinance No. 457 Section 4. Restoration of the site has been completed in conformance with the approved Site Restoration Plan including: removal of imported material, restoration of all drainage areas, manufactured slopes, pads and access roads to their original ground contours, construction and/or installation of all drainage & erosion control devices, re-vegetation and/or hydro-seeding in accordance with the Restoration Notes and the planting requirements of the Environmental Programs Department.

A Field inspection has been performed and confirms that the site has been restored in conformance with the approved referenced restoration plan.
